

OVERVIEW

Glocal Profix USD Fund reported a positive return of 0.05% in January 2023. This brought the year-to-date reading up to 0.81%. The Fund's return since inception increased to 86.30% or 12.01% annualized.

The Armenian economy started the new year impressively with a 10.5% y/y growth of the GDP in January. As in previous months, services, trade, and construction were the major drivers behind such performance - all with double-digit growth rates. In particular, services went up by remarkable 25.9% y/y, trade surged by 17.7% y/y, while the growth of construction stood at 12.2% y/y. On the contrary, a very modest increase was reported for industrial output – only 1.4% y/y.

Armenia's external trade continued its outstanding performance, as well. During the month the volume of external trade went up by 93.3% y/y to USD 1,299.9mln. Exports increased 2.3x y/y to USD 572.8mln, while imports were up by 72.5% y/y to USD 727.1mln. The trade deficit narrowed by USD 18.2mln y/y to USD 154.3mln.

The CPI went up by 8.1% y/y in January. In February, the refinancing rate of the Central Bank of Armenia remained unchanged at 10.75%. During the month the CBA purchased USD 40mln at an average exchange rate of AMD 389.24. As of the end of the month, the Armenian Dram appreciated against both USD and EUR, standing at AMD 389.34 and AMD 413.40, respectively.

DISCLAIMER

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.

The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
