## Glocal Universe fund

# FACTSHEET

## DECEMBER 2023

### Macroeconomic Update

December was a month of strong performance for all components of the fund's portfolio.

Bond markets saw a noticeable yield squeeze across a wide portion of the curve with more than 90% of IG and 95% of HY bonds ending the month with positive performance with credit spreads being tighter.

UST yields continued their sharp decrease with UST10 losing another ~25 bp.

Both IG and HY funds experience significant inflows following strong macroeconomic data and continued inflation easing. Risk on mode provided ground for strongest month performance for growth stocks, as well as Bitcoin.

Gold also remained near all time highs.

## Glocal Universe fund

Unless otherwise stated, all the data as at: 31-Dec-23

**45.5%** TTM return

**87.9%** Inception annualized

### Fund strategy

The fixed income component of the Fund focuses on instruments demonstrating attractive risk–yield combinations with issuers across developed and emerging markets. The equity portion of the fund, on the other hand, targets companies with strong growth potential. Overall, the fund's strategy is to combine the benefits of fixed income and equity securities to ensure long-term capital growth

#### Disclaimer

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. Past performance is no guarantee of future results. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies. The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
