

OVERVIEW

In June 2019, Glocal Profix USD fund generated a positive return of 0.57%. According to macroeconomic indicators published by Armstat, GDP surged by 7.3% for both May and the 5-month period leading to May from the beginning of the year; CPI went up by 1.9%.

Services, Industry and Trade were the main drivers of the growth, by a respective increase of 14.8%, 10.2% and 4.9% in May. Construction volumes and Electricity production were little changed – an expansion of 2% and 1%, respectively. Exports increased by 11.7% during the month and stood at USD 960.8mln from the beginning of the year; the volume of Imports, by contrast, declined by 0.9%, improving the trade balance by USD 57.8mln, relative to the same period a year ago. The Central Bank's refinancing rate remained unchanged at 5.75%; yields on 10-year AMD-denominated Government bonds stood at 9.7%. Armenian dram appreciated against USD and depreciated against EUR – reading 477.11 and 543.19, respectively.

The Fund's return since inception stood at 23.40%, rounding to 12.25% if annualized.

DISCLAIMER

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.

The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
