

OVERVIEW

In March 2023, the net asset value of the Glocal Profix USD Fund increased by 0.38% m/m, pushing the year-to-date return up to 1.19%. The since-inception return of the Fund went up to 87.00% or 11.89% annualized.

February 2023 was another month with a remarkable performance of the Armenian economy that translated into 11.3% y/y upsurge of the domestic GDP. Again, double-digit growth rates were reported for services, trade and construction at 21.2% y/y, 18.2% y/y and 13.9% y/y, respectively. However, only a 0.7% y/y improvement was achieved for the industrial output.

As for the external trade, its volume nearly doubled under a continued outstanding performance. During the month, the volume of external trade went up by 93.3% y/y to USD 1,299.9mln. Exports increased 2.3x y/y to USD 572.8mln, while imports were up by 72.5% y/y to USD 727.1mln. The trade deficit narrowed by USD 18.2mln y/y to USD 154.3mln.

There was a significant improvement of inflation in March – only 5.4% y/y. With this in mind, the Central Bank of Armenia kept the refinancing rate unchanged at 10.75%. During the month the CBA purchased USD 162.6mln at an average exchange rate of AMD 388.80. As of the end of the month, the Armenian Dram appreciated against USD and depreciated against EUR, standing at AMD 388.48 and AMD 422.28, respectively.

DISCLAIMER

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.

The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
