

OVERVIEW

In June 2018, Glocal Profix AMD Fund generated a negative return of 0.26% on its net asset value. This was mainly due to steepening of the yield curve, whereby mid-to-long-term yields increased by 13bps on average.

The market sentiment is that the yields in the market have bottomed, a fact that is supported by the cancellation of the May 3-year G-bonds auction for total amount of AMD 7bln. The auction did not take place, as there were not enough bids from the market participants.

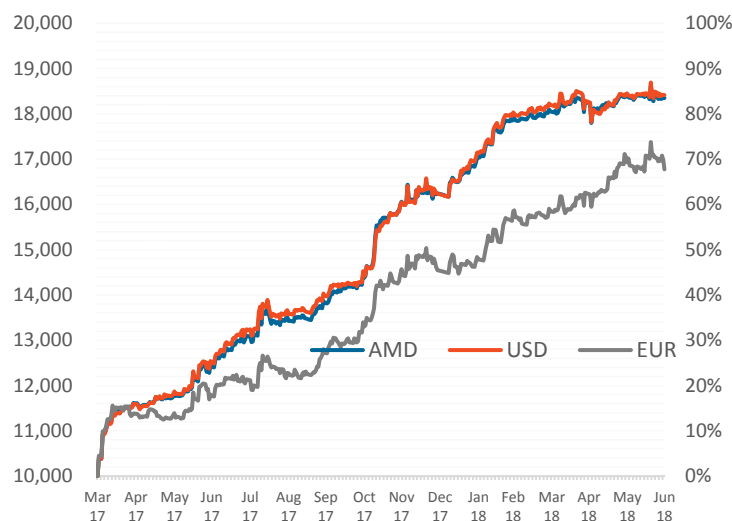

The Fund's return since inception stood at 83.51%, or 62.4%, if annualized.

FUND FACTS

The Fund is registered with the Central Bank of Armenia with participation allowed to qualified investors.

DISCLAIMER

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.

The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
