

## OVERVIEW

Glocal Eurobonds Fund reported a positive return of 17.61% in December 2022, bringing the figure for the year up to 24.61%. The annualized since-inception return of the Fund thus increased to 78.95%.

The Armenian economy continued its double-digit growth in November 2022. In particular, the GDP of the country went up by a remarkable 13.8% y/y bringing the 11M figure up to 14.4% y/y. During the month, services and trade were the main sectors behind the economic growth: +30.9% y/y and +22.1% y/y, respectively. Construction works increased by 11.3% y/y, while the industrial output slightly dropped by 2.3% y/y.

The growth of the external trade for the first 11 months of the year stood at 67.8% y/y. During that period exports increased by 75.20% y/y to USD 4,749.2mln, while imports were up by 63.6% y/y to USD 7,739.8mln. Consequently, the trade deficit widened by USD 970.4mln y/y to USD 2,990.6mln.

The CPI went up by 8.3% y/y in December. Given the continued inflation pressure, especially coming from the external markets, the Central Bank of Armenia increased the refinancing rate by 0.25pps to 10.75%. Throughout the same period, the CBA purchased USD 57.9mln at an average exchange rate of AMD 393.50. The respective annual volume amounted to USD 573.8mln. As of the end of December, the Armenian Dram appreciated against USD and depreciated against EUR, standing at AMD 393.57 and AMD 420.06, respectively.

## DISCLAIMER

**The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment.** PAST PERFORMANCE IS NO GUARANTEE

OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.
